Research Reports/Theses

Licenses & certifications

Technical Skills

C/C++/C#
Python/Numpy/Pandas
Matplotlib/Seaborn/sklearn
TensorFlow-Keras/PyTorch
CERN ROOT
Fortran
Mathematica
LaTeX/TikZ
Gnuplot
KiCad/LTSpice
Vi/Emacs/Unix/Linux
Mac OS/Windows
HTML/CSS/JavaScript/PHP
SML

Language Skills

English (Native)
Dutch (Basic)
German (Basic)
Danish (Basic)

Education

Master of Science in Physics & Minor in Machine Learning — Oct. 2021 - July 2023
Johannes Gutenberg University of Mainz
German GPA: 1.4 (Magna Cum Laude & Excellence Track Physics)

Bachelor of Science in Physics — Sept. 2017 - May 2021
Stony Brook University
GPA: 3.76/4.00 (Magna Cum Laude & Honors in Physics)

High School — Sept. 2014 - June 2017
Earl L. Vandermeulen High School
Specialized in mathematics and science
GPA: 98.65/100.00

Awards

JGU Mainz Excellence Track Certificate — July 2023
JGU Mainz Excellence Track Scholarship Award — Oct. 2021 - July 2023
NYS STEM Incentive Program Scholarship Award — Sept. 2017 - May 2021
Stony Brook Presidential Scholarship — Sept. 2017 - May 2021
AP Scholar with Distinction — May 2017

Research Experience

ALPS Project - AI-based Learning for Physical Simulation — Aug. 2023 - Jan 2024

Research project: Discover *interpretable* physical models and employ novel symbolic regression methods, here. TA'd for the course "Statics and Strength of Materials." References: Prof. Lucantonio, a.lucantonio@mpe.au.dk, Prof. Andriollo titoan@mpe.au.dk

Master-Thesis - Search for Axion-like particle in exotic decays of the Higgs boson with the final states of $ll\gamma\gamma$ — Oct. 2022 - July 2023

Search for $H \rightarrow Za$ decay as external ATLAS/CERN member. Perform selection cuts on data. Rewrote analysis software in C++, here and improved ROOT RDataFrame implementations in Python and C++. Merged ROOT CERN pull-requests here. References: Prof. Schott, Matthias.Schott@cern.ch, Dr. Naumann axel.naumann@cern.ch

Research - Search for dijet resonances in events with an isolated lepton using $\sqrt{s}$ = 13 TeV proton–proton collision data collected by the ATLAS detector — May 2020 - Oct. 2021

Analysis & simulate data as external ATLAS/CERN member. Fit empirical functions to particle event data. Performed signal injections to model statistical fluctuations and search for BSM physics. Reference: Prof. Tsybychev, dmitri.tsybychev@stonybrook.edu

Work Experience

Para-educator — Mar. 2024 - May 2024

Provide instructional reinforcement & physical assistance to students. References: MacKenzie Sheaff, msheaff@lps.org, Michael Long, mlong4@lps.org

Django Web Developer Quantum Computing — Nov. 2022 - July 2023

Converted the GUI (graphical user interface) for the quantum computer at JGU Mainz to a responsive website using Django, here. Reference: Maximilian Orth, morth@uni-mainz.de

LaTeX and TikZ Typesetter — Feb. 2022 - Nov. 2022

Typeset hand-written notes and drawn figures for a particle detector's course at JGU Mainz in LaTeX and TikZ, here. Reference: Dr. Ulrich Müller, ulm@uni-mainz.de

Wyzant Tutor — March 2021 - Present

Tutor undergraduate students in STEM topics such as the C/C++ and Python programming languages, as well as physics, calculus, and differential equations, here.
